PREMSINGH PADYA

Software Developer | AEM Developer | Application Support Analyst | Technical Support Engineer
Ottawa, ON | 343-558-7818 | premsinghpadya944@gmail.com | Portfolio: https://getopscue.com

PROFESSIONAL SUMMARY

Software Developer and Application Support professional with 2.3 years of enterprise experience at HCLTech supporting 32 Munich Re London applications, including Adobe Experience Manager (AEM), Level 2 production support, incident and service request management, SLA-based prioritization, release validation, and technical documentation. Completed an Ontario Graduate Certificate in Full Stack Software Development at Lambton College in Ottawa with a 3.70/4.00 GPA and Dean's Honour List recognition. Built and deployed GetOpsCue, a live React/Vite + Supabase operations platform with authentication, password reset, Row Level Security, role-based dashboards, Netlify deployment, and custom domain setup. Seeking Software Developer, Front-End Developer, AEM Developer, Application Support Analyst, Technical Support Engineer, or Junior Full Stack Developer roles in Canada.

TECHNICAL SKILLS

Languages and Web: JavaScript, HTML5, CSS3, Java, SQL, responsive design, mobile-first UI, accessibility-aware layouts
Frontend: React, Vite, component-based UI, form workflows, dashboard interfaces, landing pages, QR-enabled web pages
Backend and Database: Supabase, PostgreSQL, Row Level Security (RLS), Supabase Auth, storage policies, data validation, API-driven workflows
Adobe Experience Manager: AEM Sites, templates, components, DAM, Content Fragments, Experience Fragments, CRXDE, OSGi, Sling Models, Servlets
Tools and Support: Git, GitHub, Maven, Netlify, ServiceNow, Jira, incident management, SLA tracking, release validation, documentation
Professional Strengths: Troubleshooting, root cause analysis, stakeholder communication, workflow analysis, customer-facing problem solving

PROFESSIONAL EXPERIENCE

Software Engineer - AEM Developer and L2 Application Support | HCLTech | India | Oct 2021 - Dec 2023

- Supported 32 Munich Re London applications in a Level 2 production support environment, handling incidents, service requests, user issues, and application defects through ServiceNow and Jira.
- Investigated application behavior, reproduced defects, validated data with SQL, documented findings, and coordinated with development, infrastructure, database, and business teams for resolution.
- Supported AEM-related issues involving Sites, templates, components, DAM assets, content authoring, OSGi services, Sling Models, Servlets, Java backend behavior, and frontend presentation issues.
- Participated in SLA-based prioritization, release readiness checks, post-deployment validation, standups, handover documentation, knowledge transfer sessions, and troubleshooting calls.
- Created support documentation, recurring issue notes, troubleshooting steps, and escalation details to improve incident consistency and service delivery.

Founder and Product Lead - GetOpsCue | Prem All Season Services | Ottawa, ON | 2026 - Present

- Designed and deployed GetOpsCue, a live operations proof platform for multi-location businesses to complete shift checklists, upload photo proof, report issues, and provide manager dashboards.
- Implemented workflows for store PIN access, public inquiry forms, Owner/District Manager dashboards, Super Admin governance, status controls, active account checks, and password reset for approved accounts.
- Built the security model around approval-only dashboard access, Supabase Auth, PostgreSQL RLS, restricted PIN table access, protected service leads, and public deployment without private secrets.
- Prepared technical documentation, project overview, problem statements, demo materials, video assets, and pilot-readiness content for business and organizational review.

Concierge Associate / Acting Store Manager | DYMON Storage | Ottawa, ON | Oct 2025 - Present

- Supported daily store operations, leasing, customer service, cash handling, account updates, facility tours, retail product sales, and issue resolution in a high-volume customer environment.
- Identified recurring customer navigation and operational visibility problems and designed an independent Smart Navigator prototype using JavaScript, SVG routing, JSON route data, and mobile-first design.
- Strengthened communication, prioritization, documentation, coaching, customer escalation, and business process skills that translate directly into support and product roles.

Shift Manager | KFC Canada | Ottawa, ON | Aug 2025 - Present

- Led shift execution, closing procedures, food safety checks, inventory support, cash checks, team coordination, customer issue handling, and operational follow-up in a fast-paced restaurant environment.
- Applied frontline operations knowledge to design GetOpsCue workflows for opening, mid-shift, closing, cleaning, safety, photo proof, and manager visibility.

SELECTED TECHNICAL PROJECTS

GetOpsCue - Operations Proof Platform | React, Vite, Supabase, PostgreSQL, RLS, Supabase Auth, Netlify

- Built live platform for shift reports, task checklists, photo proof, issue reporting, Owner/DM dashboards, Super Admin controls, access status management, and password reset flow.
- Designed product around least-privilege access: public visitors can submit inquiries only, crew uses store PIN flow, Owner/DM users see assigned stores, and Super Admin controls setup and access.
- Created complete project documentation, demonstration deck, problem statement, advertising video assets, and readiness materials for business review.

DYMON Coventry Smart Navigator | JavaScript, SVG, JSON, shortest-path routing logic

- Created a mobile-first wayfinding prototype using structured route data, unit validation, shortest-path logic, animated path display, and responsive deployment concepts.

QR Review and Feedback Websites | HTML, CSS, JavaScript, GitHub Pages, Google review links

- Built mobile-friendly QR-enabled feedback and review interfaces for small-business and customer-facing workflows with simple user journeys and fast load times.

EDUCATION

Ontario Graduate Certificate - Full Stack Software Development | Lambton College, Ottawa | Jan 2024 - Aug 2025 | GPA: 3.70/4.00; Dean's Honour List

Bachelor of Technology - Computer Science and Engineering | Kakatiya Institute of Technology and Science, Warangal | 2017 - 2021 | 80.2%

TARGET ROLES AND ATS KEYWORDS

Software Developer, Full Stack Developer, Front-End Developer, AEM Developer, Application Support Analyst, Technical Support Engineer, Production Support Analyst, Junior Product Engineer, Solutions Developer, React, JavaScript, Java, SQL, PostgreSQL, Supabase, AEM, ServiceNow, Jira, Git, Maven, troubleshooting, incident management, SLA, documentation, RLS, authentication, dashboard, API workflows.
